## **DETAILED ACTION**

### ***Response to Amendment***

The amendment/election filed on November 4, 2002 has been entered.

Claims 2-14 are pending.

### ***Claim Objections***

Claims 9-14 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. (i.e., see, 102 explanation below of what applicant claims)

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102 (b) as being anticipated by Schipper HM, et al. (1997). Blood Heme Oxygenase-1 Levels are Decreased in Alzheimer Disease, Soc. Neuroscience 23:1641 (Abs. 637.10).

Applicant claims a commercial package comprising means for determining the concentration of heme oxygenase-1 (HO-1) and/or a nucleotide sequence encoding HO-1, in bodily fluid or non-neural tissue obtained from a patient.

Art Unit: 1654

Schipper HM et al. anticipate the claimed invention by Schipper HM et al. teach competitive ELISA (please note: an ELISA microwell container and/or test system constitutes a commercial package) was used to determine HO-1 protein levels in plasma and blood lymphocytes derived from subjects. Therefore, Schipper HM, et al. anticipate the instant claims above.

Please note that it is legally well established that printed matter-e.g., providing instruction to a known product, to show its intended use does not lend patentable distinction to the product, per se-i.e., a well known compound, packaged and labeled to show its new use, is not patentable (see, e.g., *In re Haller*, 73 USPQ 403). Therefore, the printed instructions showing intended use fail to lend patentable distinction to the claimed invention. Therefore, the cited reference above is deemed to anticipate the instant claims above.
